

## Univa N

Univa N insulation, is an ultra-lightweight, anti-compression, low loft insulation. The model is a needle-punch insulation that incorporates our special Clo-i fibres forming an incredibly stable insulation. This model not only maintains its integrity under duress but also bounces back making it ideal for high compression areas in garments and footwear. UnivaN is available as a standalone insulation in a variety of weights.

Univa N insulation is available in the following weights (gsm): 80, 100 and 200.

### Key features

Anti compression

Stable

Compact

Low loft

Clo-i fibres

CODE	Weight (gsm)	Warmth Clo Value	Breathability Vapour resistance (Ret)	Metres per roll
N80I2	80	0.65*	7.57*	80
N100I2	100	0.81	7.30	60
N200I2	200	0.97*	8.76*	50

\*Estimated values based on N100I2 test results

Key usages: Footwear, high compression areas in clothing.
